## CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts, Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index.

| | PHYSICS ABSTRACTS | | ELECTRICAL & ELECTRONICS ABSTRACTS | | COMPUTER & CONTROL ABSTRACTS | |

## ORDERING PROCEDURE

### THE AMERICAS

**North (including Canada), Central and South**

All orders from the above areas, and orders from members of Institute of Electrical and Electronics Engineers Inc. anywhere in the world, should be sent to Fulfillment Manager, Institute of Electrical & Electronics Engineers Inc., 445 Hoes Lane, P.O. Box 1331, Piscataway, N.J. 08855-1331, USA. Telephone (201) 981 0060.

### 日本：

INSPEC 刊行物の購入価格は、すべて円建てとなっており、航空便(ASP扱)で送られます詳細については、最寄りの洋書取扱店又は、総代理店ユサコ株式会社（昭和58年10月1日より社名変更）〒105 東京都港区新橋1 13 12 電話(03)502 6471までお問合わせ下さい

### REMAINDER OF THE WORLD

All remaining subscriptions should be sent to INSPEC Marketing Department, P.O. Box 96, Stevenage, Herts SG1 2SD, United Kingdom. Telephone (0438) 313311, Telex 825578 IEE STV G. Facsimile (0438) 742792.

## OTHER INSPEC SERVICES

### SDI

(Selective Dissemination of Information.)
This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

### TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

### TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

# The emis Datareviews Series of Books

These publications are collections of articles specially written by the world's leading experts in semiconductor materials research. They cover the properties of the most widely used, and up and coming materials. The information is considered the most current and up-to-date which has been verified by those researchers at the forefront of technology. Each book is highly structured and has a comprehensive subject index.

Current Books in the series are:-

Amorphous Silicon
Gallium Arsenide
Mercury Cadmium Telluride
Silicon
Lithium Niobate
Indium Phosphide
